KaleidaCare Solutions

The information you need—when you need it.

We've designed KaleidaCare Solutions to empower your organization to enhance care, protect funding, and safeguard licensing.

Enhance your care

KaleidaCare Solutions provides decision makers with a total picture of the care received by individual clients on a real-time snapshot or historical basis. In any given situation, KaleidaCare Solutions provides the means to document care specifics as they happen so that appropriate actions can be taken. At the same time, our program helps protect the privacy of a client's medical and personal information.

Protect your funding

KaleidaCare understands the pressure of budget cuts. We know that agencies that can provide validated evidence of the value of their program outcomes on both an individual and aggregate basis, as well as compliance with federal and state mandates for timely information submission, will fare the best.

KaleidaCare is your diligent partner in ensuring your agency has the capability to address the latest in compliance requirements. Through our national client base and ongoing interface with critical state and federal associations, we monitor compliance changes making their way through the mental health and social services system. Our reporting tools address a range of program-specific and compliance requirements such as:

- CAFAS tools
- HIPAA-information security and redundancy
- SACWIS-individual case progress
- Chaffe-performance measurement and patient outcomes

Revenue Maximization Module

In the mental health and social services fields, most organizations "leak" or lose 10% or more of their potential revenue due to poorly designed financial management systems. To enhance the financial management capabilities of home and community based service programs, KaleidaCare offers a state-of-the-art revenue maximization module.

Safeguard your licensing

Submission of demographics and treatment progress statistics is no longer an arduous task of wading through an ocean of paperwork. KaleidaCare provides access to aggregate outcome information for overall performance analysis in the timeframe required, freeing everyone up to focus on the direct care of clients.

Supervisory tools help to track state required Continuing Education Units (CEUs) for caseworkers and administrators and also tracks licensing and recertification of foster homes and facilities.

All of KaleidaCare's customers are supported by our clinical experts who share best practice information from across our national customer base.

KaleidaCare evolves with you by:

- Staffing Licensed Masters- Level Social Workers and subject matter experts
- Performing six-month customer checkups
- Hosting periodic national user forums
- Facilitating executive exchanges on national best practices
- Maintaining alliances with key state and national associations

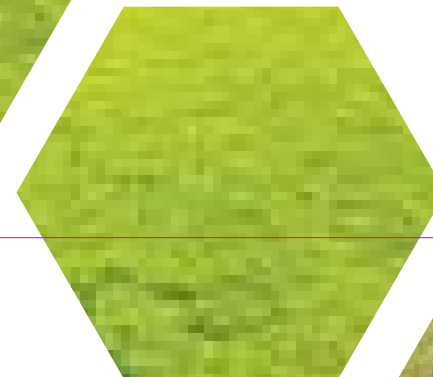

About Us

Based in Austin, Texas, our team has more than 80 years of combined industry experience in technology and social services. KaleidaCare is blazing new trails in service delivery, growth potential and workflow efficiency for organizations of all sizes.

We don't consider ourselves just a software vendor, but a service provider specializing in customer support. KaleidaCare operates as an Application Service Provider – which means our applications are hosted, managed, and supported directly by us – offering the most comprehensive Internet-based MIS systems available for mental health and social service organizations.

And our team of clinical experts provides our customers with best practices information from across our national customer base, ensuring the highest quality care possible as their organizations evolve.

With focus on customer support and teamwork, KaleidaCare is changing the landscape of social services.

Introducing KaleidaCare Solutions

The information you need—when you need it.

KaleidaCare offers a web-based care management and reporting software called KaleidaCare Solutions that helps a wide variety of mental health and social service agencies administer programs and services, track client admission and manage client treatment and outcomes.

Requiring minimal IT infrastructure, KaleidaCare Solutions is priced according to your needs on a monthly subscription. Mental health and social service organizations can input, review and manage information from the office, home or any Internet-enabled computer.
